Summary

Entry-level Software Developer with hands-on experience in Javascript, Python, and React, specializing in building and deploying dynamic web applications. Successfully developed and deployed multiple projects utilizing modern frameworks and authentication solutions. Holds a B.S. in Biological Sciences and brings a strong analytical mindset to software development. Passionate about creating scalable, user-friendly applications and eager to contribute technical expertise to a dynamic development team.

Technological Skills

- Core Stack: Javascript, React, Next.js, TailwindCSS, MongoDB, Node.js
- Familiar: Python, SQL, MySQL, Git, Github, Postman, Typescript

Projects

Personal Website: <https://allenorpia.vercel.app/> - [for additional information and projects]

Estate Pirates

- Built a real estate platform using the MERN stack, enabling dynamic property listings.
- Optimized state management and data fetching with React Hooks for a responsive UI.
- Designed and maintained database models with Prisma, ensuring scalability.
- Integrated Auth0 for seamless and secure authentication.
- Implemented advanced search and filter features for efficient property discovery.

Nouveau Depart

- Developed an intuitive front-end using Next.js and Javascript for a seamless user experience.
- Integrated a rich-text editor for users to compose and publish blog posts, boosting engagement.
- Implemented MongoDB with Prisma ORM for efficient content management and scalability.
- Secured authentication and authorization with NextAuth, ensuring a smooth login experience.

Breads (Social Media Threads Clone)

- Developed a full-stack social media platform using Next.js and Typescript for a seamless and scalable user experience.
- Designed a modern UI with TailwindCSS and ShadCN, ensuring a sleek and responsive interface.
- Implemented CRUD functionality, allowing users to create, edit, delete, and interact with posts
- Enabled commenting and replying, fostering user engagement and discussions.
- Integrated Clerk authentication, enabling users to sign in and manage their profiles securely.
- Built a community/organization feature, allowing users to create and join niche groups.

Work Experience

Boiling Point

Fremont, CA

Server - Bartender

- Efficiently multitasked between server and bartender roles, delivering a seamless customer experience in a fast-paced environment.
- Managed inventory and supply tracking, ensuring optimal stock levels through organized inventory control.
- Trained and mentored new team members, improving service efficiency and fostering a collaborative team environment.
- Developed strong problem-solving and communication skills by handling customer inquiries and resolving issues effectively.

Hiro Nori Ramen

Santa Clara, CA

Cashier/Server

- Maintained accurate transaction records and a well-organized checkout system, demonstrating attention to detail and data accuracy.
- Collaborated with management to enhance guest experiences, utilizing analytical thinking to resolve customer concerns efficiently.
- Strengthened adaptability and teamwork in a dynamic environment, skills essential for fast-moving and problem-solving roles

Education

University of California, Davis

Davis, CA

B.S, Biological Sciences
